

T12 Arms- Slip on and Bolt on

can convert a standard forklift into a specialized handler

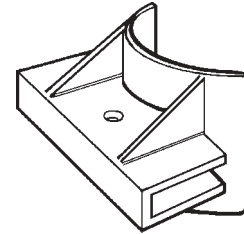

T12GP Series General Purpose Arms..

can convert any T7 Series Hydraulic Clamp into a General Purpose Clamp. All arms are fully welded construction with vulcanized rubber on the inner surfaces. Chamfered leading edges on the arms reduce product damage when sliding between loads in tightly stacked areas.

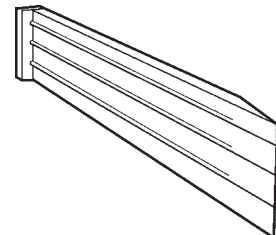

T12DA Series Drum Arms..

can convert any T11 Series Hydraulic Fork Clamp into a Drum Clamp. All arms are of welded construction with contoured pads to suit particular drum diameters. Drum arm capacities must match those of the clamp selected.

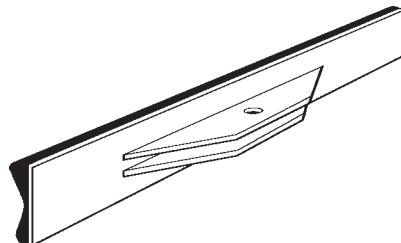

T12BA Series Bale Arms..

can convert any T7 Series Hydraulic Clamp into a standard bale clamp. All arms are "slab type" construction with chamfered leading edges to "knife" in between stacks. Horizontal ribs over the arm inner faces provide excellent friction when picking up highly compacted bales of product.

T12MA Masonry Arms..

can convert any T11 Series Hydraulic Fork Clamp into a paving slab or interlocking brick clamp. All arms can be quickly installed or removed by means of a quick release pin supplied with each pad.
