

# T20 Scoop Bucket

converts a conventional forklift truck  
into a hydraulically powered front end loader

---

## Models available

Carriage mounted (standard)  
Fork Mounted  
Shaft mounted

## Features

Smooth hydraulic forward dumping  
Hydraulic lock valve to prevent forward drift  
Full width abrasion resistant blade  
Heavy duty chrome cylinder rods

## Options

Special widths and capacities  
Quick disconnect mounting

**Carriage Mounted**

**Fork Mounted**

Total Scoop Buckets can be installed on any standard forklift in a matter of seconds converting it to a hydraulically powered front end loader.

Used to transport and dump various products such as sand, earth or gravel this versatile bucket can be stopped and held in any dumping position, allowing controlled release of the load.

Fast removal of the bucket allows the forklift to be returned quickly to its more conventional use.

**Make short work of loading and unloading all types of bulk materials!**
