Wide back-plate to eliminate coil damage
Low mount boom for small coil pick up

Options

Various diameters and capacities
Centre or top mounted boom
Quick disconnect mounting

Models available

Standard carriage mounted
Fork Mounted
Shaft mounted

Total Coil Carriers are high capacity round booms capable of lifting (from within the core) various types of coiled products such as rolled plastic, steel, wire or concrete pipe.

All of our models can be installed on any standard forklift truck in a matter of seconds, eliminating manual handling of large, heavy unstable loads.

The large diameter boom with a smooth rounded tip gives extra support to the inner core while the wide back plate reduces damage caused by misalignment of the forklift when entering the coil.

Simple to use in heavy duty applications!
