

T28 Snow Plow

temporarily converts a standard forklift truck
into an efficient snow clearing vehicle

Models Available

Carriage mounted
Fork mounted

Features

Spring loaded blade that will trip forward
when encountering an unexpected resistance.
Manual angling of blade to clear a swath to
the right, left or center
Shear pins provided to protect the plow and
the driver when overloaded
Mounts to any standard forklift truck

Options

Hydraulically operated slewing from the drivers seat.
Wider blade models

Total Snow Plows are designed for temporary use when
mounted to any pneumatic tired forklift yard truck.

The angled blade is capable of cutting a swath to the right, left
or on center. The spring loaded trip blade provides protection
for both the driver and forklift if a snow covered resistance is
encountered.

Solid steel construction, fast mounting and built in safety fea-
tures make short work of clearing large snow covered areas.

**Due to lack of traction, snow plows are not suitable
for mounting onto cushion tired forklift trucks!**
