

T30D Fork Positioner

**hydraulic fork movement that
eliminates manhandling of heavy forks**

Features

Excellent visibility
Smooth fork movement
Equal fork movement
Self aligning cylinders
One piece hydraulic cartridges
Bronze slide bushings
Sideshift capability even when
forks are fully open or closed

Models and Options

Sideshifting or basic models
Various fork sizes
Special ranges and capacities
Load backrests to suit
Independent fork movement

Total Fork Positioners are hydraulically operated carriages that can quickly open or close forks equally to accommodate narrow or wide loads without the forklift driver leaving the safety of the forklift truck.

Operation of this unit takes place from the comfort of the operators seat, therefore eliminating injuries caused by manual fork movement.

The unique rear-mount sideshift option allows sideshifting even when forks are fully open or closed (not possible with integral sideshifting), assuring precise positioning for placing or retrieving loads in confined locations.

Move forks easily without leaving the drivers seat!
