

T32S Sideshifting General Purpose Clamp

the safest, most reliable method of handling combinations
of baled, cartoned and containerized products

Models available

Basic -non sideshifting
Sideshifting
Rotating

Options

Numerous ranges and capacities
Special pad sizes
Quick disconnect mounting

Features

High tensile slab arm
Two piece floating slide bushings
Self aligning hydraulic cylinders
Light weight slide rail construction
Aluminum vulcanized rubber pads

Total General Purpose Clamps are used extensively for lifting pallet-less products such as bales, cartons or steel/plastic containers. The frames of all Total clamps are constructed from both steel and alloy for a maximum strength to weight ratio.

Slim tapered high tensile steel slab-arms and bolted-on aluminum vulcanized rubber pads allow lifting and close stacking of both fragile and non fragile products. Many applications can be performed with just this one versatile hydraulic clamp. Rotating models are also available for dumping containers of various products.

Efficient handling of unpalletized products of all shapes and sizes!
