

# T4 Fork Extensions

## Features

- Simple installation and removal
- All welded construction for greater strength
- Heavy duty rear retainer for positive anchoring to fork
- Tapered front for easy entry underneath loads
- Snug fit on all forks

**Warning!** Fork extensions are for stabilizing purposes only and should not exceed 33% of the fork blade, or be used for carrying the load without full support from the appropriate fork

## Options available

- Special lengths and widths to suit all forks
- Contoured top plates for roll pick up
- Heavy duty models

**Total Fork Extensions** can temporarily increase (by up to 33 percent) the blade length of a standard pair of forks, allowing pick-up of light weight, large volume loads. Easily installed in a matter of seconds without the use of tools, extensions are available in numerous sizes
