

T51 Tubing Scoop

the simplest way to unload and transport
random lengths of strapped tubing or extrusions

Features

Fast mounting onto forks of standard forklift truck
Slides easily under long bundles of tubing or extrusions
Reduces damage caused by handling loads with short forks

Options

Lengths and widths to suit numerous load configurations
Fork pockets to suit all fork sizes

Total Tubing Scoops are designed to mount quickly to the forks of any standard forklift truck, enabling it to securely lift and transport bundles of strapped tubing or extrusions lengthwise. Being able to unload trailers from the end saves warehouse space and eliminates damage caused by sagging when the load is picked up from the side.

Due to the numerous different applications, there are no standard models.

Please contact Total Attachments for specifications of a unit to suit your particular requirement.
