

T6 Drum Handlers

the only safe method of handling drums made of steel, fiber or plastic

Total Waist Type Drum Handlers are used to securely carry one or two 55 gallon steel drums, by mechanically and automatically clamping around the mid section of the drum.

Total Rim Type Drum Handlers are used to securely carry one or two steel, plastic or fiber drums by mechanically and automatically clamping the upper lip of the drum, while the bottom rests in a contoured cradle.

Features

- Automatic pick up and release of drum
- Fast attachment to forks of any forklift truck
- Compact design for easy storage when not in use
- Minimal amount of moving parts
- Welded construction

Options

Carriage mounted models to suit any forklift truck

Eliminate back injuries when moving heavy awkward drums!
