

T8R Rotating Bale Clamp

the safest, most reliable method of clamping
and inverting all types of baled products

Models available

360 degrees rotation
180 degrees rotation

Options

Numerous ranges and capacities
Special bale arm sizes
Quick disconnect mounting

Features

High tensile slab arm
Two piece floating slide bushings
Self aligning hydraulic cylinders
Light weight slide rail construction
Smooth continuous rotation

Total Rotating Hydraulic Bale Clamps are used extensively for lifting and inverting pallet-less bales of products such as cotton, fabric, cardboard, or pulp paper.

The frames of all Total bale clamps are constructed from both steel and alloy for a maximum strength to weight ratio. Rotation is achieved via a “patented” ring-gear that outperforms all conventional ball or roller bearings.

Slim tapered high tensile steel slab-arms incorporated into this clamp, allows close stacking of bales, providing the utmost utilization of warehouse and yard space.

Handles and rotates bales of various materials!
