Quick disconnect mounting

Features

Pivoting aluminum rubber faced pads
High tensile load arm
Two piece floating slide bushings
Self aligning hydraulic cylinders
Light weight slide rail construction
Full width load backrest

Total Hydraulic Appliance Clamps are used extensively for lifting and stacking pallet-less appliances such as refrigerators, washers, dryers and stoves. The frames of all Total appliance clamps are constructed from both steel and alloy for a maximum strength to weight ratio.

Slim tapered aluminum rubber faced pads enable this clamp to slide easily between tightly stacked cartons eliminating large unwanted spaces that waste warehouse space.

Efficient handling without damage to appliances!
