

T9P Carton Clamp

the safest, most reliable method of handling
delicate unpalletized products

Models available

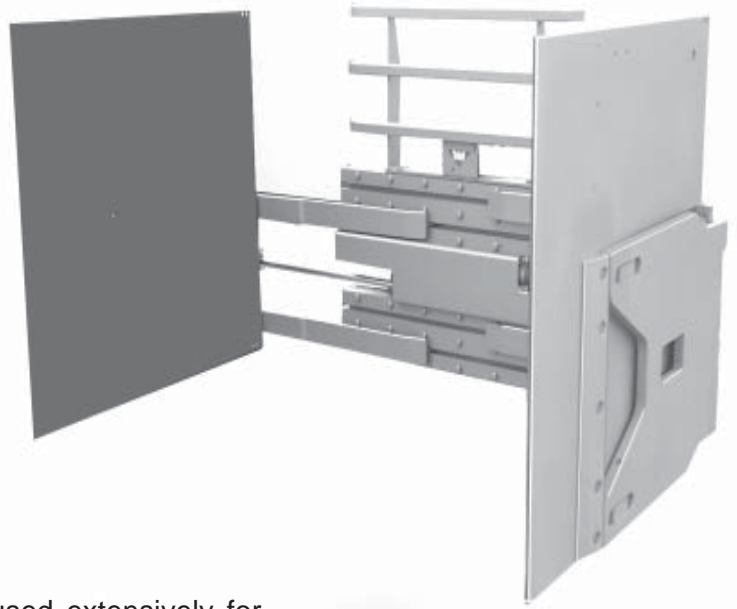

Standard sideshifting
Extra wide range - for double handling

Options

Numerous ranges and capacities
Special pad sizes
Quick disconnect mounting

Features

Pivoting aluminum rubber faced pads
High tensile load arm
Two piece floating slide bushings
Self aligning hydraulic cylinders
Light weight slide rail construction
Full width load backrest

Total Hydraulic Carton Clamps are used extensively for lifting and stacking numerous types of pallet-less products such as appliances and televisions.

The frames of all Total carton clamps are constructed from both steel and alloy for a maximum strength to weight ratio.

Each clamp is equipped with slim, tapered aluminum pads faced with grooved vulcanized rubber. This durable rubber enables each pad to clamp securely over a wide surface area, ensuring that the load is evenly squeezed without causing product damage.

Both pads are removable and invertible, giving maximum lifespan before replacement is necessary.

Sideshifting is standard on all Total Carton Clamps allowing the driver to place the load with great precision, eliminating large unwanted gaps between loads and in turn saving valuable warehouse space.

Secure clamping without product damage!
